A creatively talented individual with a broad range of skills and attributes deemed useful in the creative industry. I have completed a bachelor's degree in photography and a Master's degree in photography at University for the Creative Arts and Royal College of Art respectively. These two opportunities gave me valuable knowledge and experience when it comes to the art world, photography, teamwork along with valuable information around the business side of art and the creative industries. In every job I have had I've always valued working as a team to help each other and learning new skills as my top priorities.
